ACADEMICS

Vellore Institute of Technology

Bhopal, M.P.

Bachelor of Technology, CSE (specialization in Health Informatics), Cumulative GPA: 8.33

2021 – 2025

Coursework: Database Management System, Operating Systems, Data Structures & Algorithms, Probability and Statistics, Data Science, Data Mining and Data Warehousing, Machine Learning, Artificial Intelligence in Healthcare

SKILLS

Data Analysis: Exploratory Data Analysis (EDA), Data Cleaning, Data Modeling, Feature Engineering, Statistical Analysis

Tools & Languages: Python, SQL, Pandas, NumPy, Scikit-Learn, Matplotlib, Jupyter Notebook, Excel, Power BI, Tableau

Databases & Cloud: MySQL, PostgreSQL, SQLite, AWS, Azure

Version Control & IDEs: GitHub, Visual Studio Code

WORK EXPERIENCE

Health-Tech and Automation Intern, Kshetra Consulting Pvt. Ltd.

May 2025 – Aug. 2025

- Analyzed 4.6 lakh+ patient records from a 1125-bed tertiary hospital, helping optimize resource utilization and improving patient flow, resulting in a 15% increase in footfall and Ayushman Bharat claim efficiency.
- Led micro-level voter analysis of 12L+ records across 1,000+ booths in 8 Assembly constituencies; 8 PowerBI dashboards to drive data-led outreach and constituency program design.
- Automated healthcare provider outreach through web scraping and email sequencing, improving lead generation and campaign conversion across 800+ providers; crafted targeted pitch decks, boosting conversions by 20%.
- Revamped digital presence via responsive, SEO-optimized Wix website, boosting stakeholder engagement by 15%.

PROJECTS

HealthSage : Your Health Assistant | Python, Scikit-Learn, NumPy, Pandas, Matplotlib, SQLite, Tkinter

[GitHub](#)

- Engineered a symptom-based disease predictor using ensemble ML (Decision tree, Random Forest, Naive Bayes, KNN), achieving 96% accuracy for 41 diseases.
- Designed a GUI to assist clinical screening in primary healthcare settings, reducing diagnostic time and enhancing user accessibility.
- Improved system reliability via cross-validation and confusion matrix analysis, enhancing prediction accuracy by 15% and reducing false positives by 30%.

Netra Rakshak | Python, Numpy, Pandas, Matplotlib, Scikit-Learn, PyTorch, Hugging Face

[GitHub](#)

- Engineered a deep learning-based diagnostic system for diabetic retinopathy, leveraging ResNet-152 and transfer learning to attain 96% classification accuracy.
- Deployed on Hugging Face Spaces, allowing real-time analysis for over 1,000 fundus images, enabling broader clinical adoption.

CERTIFICATIONS

AWS Academy Graduate - AWS Academy Cloud Foundations

[Certificate](#)

Business Intelligence & Analytics, NPTEL (IIT-Madras) – Silver Medalist

[Certificate](#)

The Economics of Health Care Delivery, Wharton School, University of Pennsylvania (Coursera)

[Certificate](#)

ACHIEVEMENTS & EXTRA-CURRICULAR ACTIVITIES

- National Finalist**, Health-Tech and AI Hackathon (SPIRIT'25), IIT - BHU
- Event Lead – The Bioengineering Club, VIT Bhopal:** Led events (BioExpo'23, RABVIT'24) with 1,000+ attendees; hosted leaders from IISER, IGNOU.
