EDUCATION

Vellore Institute of Technology, Bhopal

2021 – 25

B.Tech – Computer Science Engineering (Health Informatics)

8.33 CGPA

Relevant Coursework: Database Management System, Operating Systems, Data Structures & Algorithms, Probability & Statistics, Data Science, Data Mining and Data Warehousing, Machine Learning, Artificial Intelligence in Healthcare

TECHNICAL SKILLS

Data Analysis & Visualization: Python (Pandas, NumPy, Matplotlib), SQL (PostgreSQL, MySQL, Window Functions), Power BI (DAX, Data Modeling), ETL Pipelines, API Data Ingestion, KPI Design, MS Excel (Advanced Functions, PivotTables, Power Query)

Machine Learning & AI: Supervised & Unsupervised ML (Regression, Classification, Clustering), Scikit-Learn, PyTorch, TensorFlow

Tools & Platforms: AWS, Azure, GenAI, Web Scraping (Selenium, BeautifulSoup), GitHub, Streamlit, Hugging Face, WIX Studio

Domain Experience: Healthcare analytics & digital health systems, Electoral & Demographic Data Analytics, Customer Analytics, Operational & Marketplace Analytics, Survey Design & Analysis (NFHS, PLFS), Documentation & Presentations (Canva)

CERTIFICATIONS

Business Intelligence & Analytics, NPTEL (IIT-Madras) – Silver Medalist | [Certificate](#)

Apr'25

AWS Academy Graduate – AWS Academy Cloud Foundations | [Certificate](#)

Nov'23

The Economics of Health Care Delivery, Wharton School, University of Pennsylvania (Coursera) | [Certificate](#)

May'23

Applied Data Science with Python - Level 2 | [Certificate](#)

Feb'23

WORK EXPERIENCE

Kshetra Consulting | Associate – Data & Insights

Nov'25 – Present

- **Governance & Program Insights:** Analyzed House-to-House socio-political survey data from 150+ villages & Karad City to identify service delivery gaps in welfare schemes like PMAY, PM-Kisan, PMJAY & Laadki Behan Yojana; synthesized grievance patterns and beneficiary feedback into issue-wise & geography-wise dashboards that supported Jan Sampark Karyalaya's targeted voter outreach & streamlined administrative follow-ups.
- **Voter segmentation:** Executed booth-level voter segmentation by processing 1.52L+ unstructured addresses and integrated WhatsApp-based digital mobilization, improving precision of targeted outreach and enabling high-impact GOTV execution.
- **Strategic Partnerships:** Spearheaded business development by designing & pitching data-backed collaboration proposals to 5 political offices (MLAs), 3 healthcare institutions, and 10+ charitable trusts & foundations; secured strategic partnerships by integrating electoral analytics, CSR & governance insights into actionable social impact frameworks.

Kshetra Consulting | Intern – Data Analytics & Automation

May'25 – Oct'25

- **Healthcare Analytics:** Analyzed 4.6L+ OPD & IPD patient records from a 1,125-bed tertiary care hospital to map seasonal and departmental load patterns, bed occupancy trends, and district-wise patient inflow; insights improved resource utilization and outreach initiatives driving 15% rise in Ayushman Bharat claim volumes contributing to higher revenue realization.
- **Digital Solutions:** Developed a responsive, SEO-optimized website using Wix Studio for Kshetra, lifting digital reach by 15%.
- **Road Safety Analytics:** Identified accident patterns and 13+ high-risk hotspots using police FIR, hospital RTA records, and stakeholder feedback; synthesized findings into a cohesive, data-driven report with engineering recommendations; that served as the reference for MLA Dr. Atul Bhosale's speech during the July 2025 Maharashtra Assembly Monsoon Session.
- **Electoral Data Analytics & Dashboards:** Transformed raw Form 20 PDFs from the CEO Maharashtra portal into standardized, analysis-ready datasets, analyzed 16M voter records from 25,000+ polling booths across 42 Assembly and 6 Parliamentary constituencies in Western Maharashtra to build 48 Power BI dashboards highlighting high-impact zones to drive cross-constituency comparisons, targeted voter outreach, and optimize campaign resource allocation.

ACADEMIC PROJECTS

HealthSage : Your Health Assistant | Python, Scikit-Learn, NumPy, Pandas, Matplotlib, SQLite, Tkinter | [GitHub Repository](#)

- Engineered a symptom-based disease predictor using ensemble ML techniques (Decision Tree, RF, Naive Bayes, KNN), achieving 96% accuracy across 41 conditions; designed a Tkinter-based GUI to improve accessibility for primary healthcare workers.

Netra Rakshak | Python, Numpy, Pandas, Matplotlib, Scikit-Learn, PyTorch, Hugging Face | [GitHub Repository](#)

- Implemented transfer learning with ResNet-152 on APTOS 2019 dataset to classify diabetic retinopathy into 5 severity stages, achieving 96% classification accuracy. Deployed the model on Hugging Face for broader accessibility & clinical adoption.

ACHIEVEMENTS

Finalist, Health-Tech & AI Hackathon (SPIRIT'25: Annual Techno-Pharma Conference), IIT(BHU) (top 0.15% among 679 teams); developed AI-based diabetic retinopathy detection system using ResNet-152, APTOS 2019 dataset & Gradio interface | [Certificate](#)
